

Vard Academy | SeaQ Switchboards - Basic Training

In this one-day instructor-led training course, the students will get to know the main switchboard and its features on a fundamental level, and learn the system topology.

Vard Electro provides complete SeaQ switchboard packages for a range of vessel types and floating installations. We design, build, test, and install main, emergency, harbour and frequency converter switchboards, motor control centres (MCC), as well as lighting, power, ROV and other special-application distribution centres.

Our switchgear, digital controls and distribution systems are designed to cover a comprehensive range of operational and regulatory requirements and customers' specifications. SeaQ Switchboards are optimized for long lifespan and less maintenance.

Vard Academy | SeaQ Switchboards - Basic Training

GOAL OF THIS COURSE

- Provide students with general knowledge of how to operate and use the switchboard
- Give a good understanding of the switchboard structure and interfaces
- Provide easy maintenance and use of the switchboard and it's functions
- Be able to perform simple troubleshooting within the switchboard

AGENDA

- Common features of the system
- Get familiar with the functions and possibilities
- Step by step through the basics (day-to-day operation)
- Easy troubleshooting

About Vard Academy

Vard Academy offers quality-proven training focused on the company's in-house developed products and solutions. Our courses combine theoretical learning and hands-on practical training. The participants also receive a valuable experience in fault finding and troubleshooting labs. Vard Academy's instructors have long experience with the products and solutions

they present, and are also involved in the development of our products. This way, our instructors combine in-dept knowledge of all aspects of our products - both technical and practical.

All product training courses by Vard Academy can be tailored and adapted to customer needs. Vard Academy offers an open schedule standard courses as well

as customized training. Courses can be held in our training facilities, or delivered on location - on board of en route vessels or at our customer's premises, allowing further customization and optimal time management.
